Sommario/riassunto	The annual conference CLIC–it ("Italian Conference on Computational Linguistics") is an initiative of the "Italian Association of Computational Linguistics" (AILC – www.ai-lc.it) which is intended to meet the need for a national and international forum for the promotion and dissemination of high-level original research in the field of Computational Linguistics (CL), with particular emphasis on Italian. The volume gathers the Proceedings of the "Third Italian Conference on Computational Linguistics" (CLiC–it 2016), held in Naples on 5-6 December 2016. The CLiC–it 2016 papers cover a wide range of topics in the area of computational linguistics and natural language (both written and spoken) processing, by targeting state–of–art theoretical results, experimental methodologies, technologies and application

perspectives, and by addressing challenges, open issues and new perspectives related to current and novel trends of the discipline.
