

1. Record Nr.	UNINA9910219965503321
Autore	Willis Henry H.
Titolo	Current and Future Exposure of Infrastructure in the United States to Natural Hazards
Pubbl/distr/stampa	RAND Corporation, 2016
ISBN	0-8330-9626-5
Descrizione fisica	1 online resource
Soggetti	Economic systems and structures Meteorology and climatology Population and demography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction: The Need to Better Understand Current and Future Hazard Exposure -- Defining and Analyzing Infrastructure Exposure -- Current Patterns of Exposure in the Continental United States -- Climate Change and Natural Hazard Exposure -- Findings and Policy Considerations.
Sommario/riassunto	Communities, companies, and governments at all levels in the United States are making decisions that will influence where, what and how infrastructure will be built. This report describes insights about exposures from natural hazards now and in the future, as well as gaps in data that, if filled, could improve the nation's ability to assess infrastructure risk and improve infrastructure resilience.
