Sommario/riassunto	New Perspectives on Historical Latin Syntax: Constituent Syntax (Adverbial Phrases, Adverbs, Mood, Tense) is the second of four volumes dealing with the long-term evolution of Latin syntax, roughly from the 4th century BCE up to the 6th century CE. This volume, along with Volume 3, comprises chapters dealing with structure and evolution of syntactic phenomena below the level of the sentence. Topics treated in this volume include adverbs, adverbial phrases, mood/modality and tense/aspect. Chapters are distinguished by their depth of treatment, clear style and ample illustration with original ci

Sommario/riassunto	"Drawing on a wide range of sources, including Chinese-language publications, this report finds that China's strategic-deterrence concepts are evolving in response to a changing assessment of its external security environment and a growing emphasis on protecting its emerging interests in space and cyberspace. At the same time, China is rapidly closing what was once a substantial gap between the People's Liberation Army's strategic weapons capabilities and its

strategic-deterrence concepts. Chinese military publications indicate that China has a broad concept of strategic deterrence, one in which a multidimensional set of military and nonmilitary capabilities combine to constitute the "integrated strategic deterrence" posture required to protect Chinese interests. For China, powerful military capabilities of several types - including nuclear capabilities, conventional capabilities, space capabilities, and cyberwarfare forces - are all essential components of a credible strategic deterrent. Chinese military publications indicate that nonmilitary aspects of national power - most notably diplomatic, economic, and scientific and technological strength - also contribute to strategic deterrence alongside military capabilities"
