

1. Record Nr.	UNINA9910219970603321
Autore	Ayer Lynsay
Titolo	Care transitions to and from the National Intrepid Center of Excellence (NICoE) for service members with traumatic brain injury // Lynsay Ayer [et al.]
Pubbl/distr/stampa	RAND Corporation, 2015 Santa Monica, Ca : , : Rand Corporation ; , 2015
ISBN	0-8330-9145-X
Descrizione fisica	1 online resource (xxvi, 105 pages) : illustrations, charts
Collana	RR-653-OSD Care transitions to and from the National Intrepid Center of Excellence (NICoE) for service members with traumatic brain injury
Soggetti	Soldiers - Medical care - Evaluation - United States Brain - Evaluation - Treatment - Wounds and injuries - United States Brain Injuries - therapy Rehabilitation - methods Military Medicine - methods
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph "Prepared for the Office of the Secretary of Defense. Approved for public release; distribution unlimited."
Nota di contenuto	Introduction Evaluation methods History of mission of the NICoE Who is referred to the NICoE, and how does the referral process work? NICoE assessment and treatment processes Transitioning from the NICoE to the home station Discussion and recommendations Appendix A. NICoE site visit discussion guide Appendix B. Home station installation patient discussion guide Appendix C. Home station installation spouse/caregiver discussion guide Appendix D. Home station installation provider discussion guide Appendix E. Survey measures
Sommario/riassunto	Improvised explosive devices (IEDs) have been one of the leading causes of death and injury among U.S. troops. Those who survive an IED blast or other injuries may be left with a traumatic brain injury (TBI) and attendant or co-occurring psychological symptoms. In response to the need for specialized services for these populations, the U.S. Department of Defense (DoD) established the National Intrepid Center

of Excellence (NICoE) in Bethesda, Maryland, in 2010. The NICoE's success in fulfilling its mission is impacted by its relationships with home station providers, patients, and their families. The RAND Corporation was asked to evaluate these relationships and provide recommendations for strengthening the NICoE's efforts to communicate with these groups to improve patients' TBI care. Through surveys, site visits, and interviews with NICoE staff, home station providers, service members who have received care at the NICoE, and the families of these patients, RAND's evaluation examined the interactions between the NICoE and the providers responsible for referring patients and implementing treatment plans. --
