| Nota di contenuto | Selected acquisition report data and analytics Analysis of major defense acquisition programs with substantial air force funding Findings for major defense acquisition programs with substantial air force funding Selected Acquisition Report Data and Analytics -- Analysis of Major Defense Acquisition Programs with Substantial Air Force Funding -- Findings for Major Defense Acquisition Programs with Substantial Air Force Funding. |
| Sommario/riassunto | This report provides the results of Air Force weapon system cost growth analyses based on the RAND Corporation's internal Selected Acquisition Report database. The database provides consistent, current metrics to support analyses both within RAND Project AIR FORCE (PAF) and in the Air Force acquisition community. This work assesses, quantifies, and documents cost and schedule growth of Major Defense Acquisition Programs (MDAPs) and provides data and detailed program histories. |
