

1. Record Nr.	UNINA9910219981203321
Autore	McGarvey Ronald G.
Titolo	Assessment of beddown alternatives for the F-35: research report
Pubbl/distr/stampa	RAND Corporation, 2013 [Place of publication not identified], : Rand Corporation, 2013
ISBN	0-8330-8329-5
Descrizione fisica	1 online resource
Disciplina	358.4/383
Soggetti	F-35 (Military aircraft) - Cost control Military & Naval Science Law, Politics & Government Air Forces
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	The F-35 Joint Strike Fighter is the most costly aircraft acquisition program in Defense Department history. RAND assessed the potential for savings by reconfiguring the U.S. Air Force's combat-coded F-35s into larger squadrons, adjusting the Primary Aerospace Vehicle Authorized (PAA) mix across the Active and Reserve Components, and adjusting the percentage of PAA permanently assigned to locations in the continental United States.
