Difficulties in Measuring Activity Limitations Among Older Adults

Sommario/riassunto

The health care industry has continued its efforts to promote health and prevent disease among elderly populations. In this book, however, the authors argue that simple health promotion and disease prevention are not enough to address the many challenges of aging-whether it entails being physically frail, living with dementia, or approaching death. Instead, the unique focus of this groundbreaking text centers on maximizing function and well-being for the elderly. This book promotes the development and maintenance of optimal physical, mental, and social functioning, irrespective of acquired dis

Einordnung der Unternehmen in die Strategietypen -- 2. Cross-Case-Analyse -- Teil V: Aktuelle Entwicklungen und Schlussbetrachtung -- 1. Aktuelle Entwicklungen -- 2. Zusammenfassung und Limitationen --

Sommario/riassunto	Das Buch betrachtet die Transformationen im Buchhandel, die durch eine zunehmende Verbreitung von Informations- und Kommunikationstechnologien ausgelöst wurden. Es wird gezeigt mit welchen Verhaltensmustern die großen Buchhandelsketten im deutschen und US-amerikanischen Markt auf Geschäftsmodell- und Produktinnovationen reagiert haben und inwieweit sich daraus Strategietypen mithilfe wirtschaftswissenschaftlicher Ansätze ableiten lassen. Somit wendet sich das Buch in erster Linie an ein wissenschaftlich interessiertes Publikum und an Entscheidungsträger innerhalb der Buchbranche. Die Thematik ist auch über die engere buchwirtschaftliche Sicht von Relevanz, da die geschilderten Entwicklungen das Potential zur Veränderung des Leseverhaltens und der Leserezeption haben.
