

1. Record Nr.	UNINA9910220023503321
Titolo	On looking into words (and beyond) [[electronic resource] ] : structures, relations, analyses // edited by Claire Bowern, Laurence Horn, Raffaella Zanuttini
Pubbl/distr/stampa	Berlin, Germany : , : Language Science Press, , 2017
ISBN	3-946234-97-6
Descrizione fisica	1 online resource (xi, 609 pages) ; : illustrations, charts; digital, PDF file (s)
Collana	Empirically Oriented Theoretical Morphology and Syntax ; ; volume 3
Disciplina	400 410
Soggetti	Linguistics Grammar, Comparative and general - Morphology Grammar, Comparative and general - Morphosyntax Grammar, Comparative and general - Phonology Cognitive science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapter and index.
Nota di contenuto	Preface --I. Phonology --II. Morphology --III. Syntax and morphosyntax --IV. Language and linguistic theory --Indexes.
Sommario/riassunto	On Looking into Words is a wide-ranging volume spanning current research into word structure and morphology, with a focus on historical linguistics and linguistic theory. The papers are offered as a tribute to Stephen R. Anderson, the Dorothy R. Diebold Professor of Linguistics at Yale, who is retiring at the end of the 2016-2017 academic year. The contributors are friends, colleagues, and former students of Professor Anderson, all important contributors to linguistics in their own right. As is typical for such volumes, the contributions span a variety of topics relating to the interests of the honorand. In this case, the central contributions that Anderson has made to so many areas of linguistics and cognitive science, drawing on synchronic and diachronic phenomena in diverse linguistic systems, are represented through the papers in the volume. The 26 papers that constitute this volume are

unified by their discussion of the interplay between synchrony and diachrony, theory and empirical results, and the role of diachronic evidence in understanding the nature of language. Central concerns of the volume include morphological gaps, learnability, increases and declines in productivity, and the interaction of different components of the grammar. The papers deal with a range of linked synchronic and diachronic topics in phonology, morphology, and syntax (in particular, cliticization), and their implications for linguistic theory.
