Approximate methods of solution of ill-posed problems -- Chapter 3. Integral geometry problems -- Chapter 4. One dimensional inverse problems -- Chapter 5. Inverse problems for the coupled Maxwell and Lamé systems -- Chapter 6. Numerical solution of inverse problems: some examples -- Bibliography |
| Sommario/riassunto | This monograph deals with the theory of inverse problems of mathematical physics and applications of such problems. Besides it considers applications and numerical methods of solving the problems under study. Descriptions of particular numerical experiments are also included. |

| Sommario/riassunto | In 1964 the Senate Committee on Aging reported that "'once admitted to an institution ... the veteran begins ... to show signs of social and physical degeneration,'" a phenomenon that has not escaped the attention of clinicians, social scientists, veterans, and other chronic-care patients. Assuming that social withdrawal in the institutional setting was avoidable and that a strictly medical model of chronic care was inappropriate, Lella and his collaborators established a patient-government project designed to give thirty elderly men in a large |

| Sommario/riassunto | Marine management requires approaches which bring together the best research from the natural and social sciences. It requires stakeholders to be well-informed by science and to work across administrative and geographical boundaries, a feature especially important in the inter-connected marine environment. Marine management must ensure that the natural structure and functioning of ecosystems is maintained to provide ecosystem services. Once those marine ecosystem services have been created, they deliver societal goods as long as society inputs its skills, time, money and energy to gather those benefits. However, if societal goods and benefits are to be limitless, society requires appropriate administrative, legal and management mechanisms to ensure that the use of such benefits do not impact on environmental quality, but instead support its sustainable use. |
