

1. Record Nr.	UNINA9910220048603321
Autore	Robert L. Medcalf
Titolo	The Role of the Plasminogen Activating System in Neurobiology
Pubbl/distr/stampa	Frontiers Media SA, 2017
Descrizione fisica	1 online resource (132 p.)
Collana	Frontiers Research Topics
Soggetti	Neurosciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This ebook contains a series of original publications, reviews and mini-reviews by leaders in the field that address the growing importance of the plasminogen activating system in neurobiology. The articles included cover the role of the plasminogen activating system as a key modulator of blood brain barrier permeability, and the implications of this in traumatic brain injury and in ischemic stroke. State-of-the-Art manuscripts are also included that address the regulatory mechanisms that control this important process.</p> <p>This ebook contains a series of original publications, reviews and mini-reviews by leaders in the field that address the growing importance of the plasminogen activating system in neurobiology.
