Autore	Paul Christopher <1971->
Titolo	What works best when building partner capacity in challenging contexts // Christopher Paul
Pubbl/distr/stampa	Santa Monica, CA : , : Rand Corporation, 2015
ISBN	0-8330-9332-0
Descrizione fisica	1 online resource (xix, 58 pages) : black and white illustration, black and white chart
Collana	Research report (Rand Corporation)
Disciplina	355/.03273
Soggetti	Military assistance, American - International cooperation Military education - International cooperation - Training of Soldiers - International cooperation National security - International cooperation Armies Military & Naval Science Law, Politics & Government
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph "Prepared for the Joint Staff J5, the Office of Cost Assessment and Program Evaluation in the Office of the Secretary of Defense, and the Office of the Under Secretary of Defense for Policy"--
Sommario/riassunto	"For both diplomatic and national security reasons, security cooperation continues to be important for the United States. The needs and existing capabilities of various nations differ, however, as will results. In previous research, RAND identified a series of factors that correlate with the success of building partner capacity (BPC) efforts. Some of these are under U.S. control, and some are inherent in the partner nation or under its control. Strategic imperatives sometimes compel the United States to work with PNs that lack favorable characteristics but with which the United States needs to conduct BPC anyway. This report explores what the United States can do, when conducting BPC in challenging contexts, to maximize prospects for success. The authors address this question using the logic model outlined in a companion

report and examining a series of case studies, looking explicitly at the challenges that can interfere with BPC. Some of the challenges stemmed from U.S. shortcomings, such as policy or funding issues; others from the partner's side, including issues with practices, personalities, baseline capacity, and lack of willingness; still others from disagreements among various stakeholders over objectives and approaches. Among the factors correlated with success in overcoming these challenges were consistency of funding and implementation, shared security interests, and matching objectives with the partner nation's ability to absorb and sustain capabilities."--Back cover.
