Nota di contenuto	Strategic investment for innovation support -- Case studies of U.S. Government strategic investment -- Economic framework for innovation incentives -- Observations from GSI studies and economic modeling.
Sommario/riassunto	To address urgent operational needs in a changing threat environment, this report examines one type of government acquisition method, called government strategic investment (GSI). Through a combination of case studies and economic modeling, this research will help government acquisition managers judge the suitability of strategic investment methods for motivating future government mission-oriented innovation by private firms.
