Summary of Accessibility Results for Hospitals and Clinics, by County; 2.6. Summary of Accessibility Results for Hospitals and Clinics, by County and Race/Ethnicity

2.7. Summary of Accessibility Results for Mental Health and Alcohol and Drug Treatment Providers, by County

Sommario/riassunto

Examines the health care needs of newly released California prisoners; the communities most affected by reentry and the health care safety net of those communities; the critical roles that health care providers, other social services, and family members play in successful reentry; and the effects of reentry on the children and families of incarcerated individuals. Recommends how to improve access for this population in the current fiscal environment.
