

1. Record Nr.	UNINA9910163239703321
Autore	Martin Peter G
Titolo	Automation Made Easy
Pubbl/distr/stampa	Durham : , : ISA, , 2009 ©2009
ISBN	1-937560-11-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (234 p.)
Altri autori (Persone)	HaleGregory
Disciplina	670
Soggetti	Digital control systems Programmable logic devices
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Half Title -- Title Page -- Copyright -- Dedication -- Contents -- About the Authors -- Acknowledgments -- Preface -- Chapter 1 Manufacturing and Production Processes: The Raw Facts -- Chapter 2 Control of Discrete Processes -- Chapter 3 Control of Continuous Processes: Stay In the Loop -- Chapter 4 Process Control Systems: A Theory of Evolution -- Chapter 5 Control of Batch Processes: Let Them Eat Cake -- Chapter 6 Advanced Process Control: Beauty Beats the Beast -- Chapter 7 Optimization: Math Gone Wild -- Chapter 8 Simulation and Modeling: A Look Before You Leap -- Chapter 9 Safety Management Systems: Expect the Unexpected -- Chapter 10 Automation System Security: Checkmate -- Chapter 11 SCADA Systems: Beyond Four Walls -- Chapter 12 Quality Management: A Tale of Two Processes -- Chapter 13 Asset Management—Maintenance Management: Coming of Age -- Chapter 14 Human-Machine Interfacing—SCADA Software: Breaking Away from a DCS -- Chapter 15 Manufacturing Execution Systems: Two Becoming One -- Chapter 16 Enterprise Resource Planning: Business Software on Top of Automation -- Chapter 17 Automation System Integration: Enabling the Right Solution -- Chapter 18 Business Measurement and Intelligence Systems: Real-Time Knowledge -- Chapter 19 Operations Business Excellence: A New Frontier -- Chapter 20 Enterprise Control Systems: Grabbing the Technology Edge -- Chapter 21 The Bottom

Sommario/riassunto

After a quick glance at the plant floor, it is very easy to see the industrial automation industry interoperates with other functions within the enterprise. Trying to keep up with changing technologies, however, is never easy and the industrial automation environment is no exception. Whether you are a student just starting out or are a top-level executive or manager well-versed in one domain, but have limited knowledge of the industrial automation industry, it's easy to find yourself adrift in this evolving industry. That is where this easy-to-read book comes in; it provides a basic functional understanding in the field of industrial automation. In an effort to understand this industry, the authors break down the barriers and confusion surrounding the technical details and terminology used in this converging field. They provide an introductory-level approach, covering most of the major industrial automation topics, such as distributed control systems (DCSs), programmable logic controllers (PLCs), manufacturing execution systems (MESs), and so on. You may even learn a recipe or two. This book is ideal for executives, business managers, information technologists, accountants, maintenance professionals, operators, production planners, just to name a few, and provides an in-depth but easy overview for people new to the field who want to quickly educate themselves.

Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	The policy argument for rethinking health care in China -- Designing and implementing an innovative model for organizing and delivering health care can turn this challenge into an opportunity -- The "western-style" health care model offers cautionary lessons for China -- Fast-growing economies like China's have a unique opportunity to implement innovative health care systems -- Adopting population health management can propel China to world class health care.
Sommario/riassunto	After having successfully expanded health insurance coverage, China now faces the challenge of building an effective and efficient delivery system to serve its large and aging population. RAND researchers recommend that rather than emulate the models of Western countries, which have well-known limitations, China should create an innovative model based on population health management principles and sophisticated health information technology.

3. Record Nr.	UNIORUON00068680
Autore	BODDY, Alexander A.
Titolo	To Kairwan the Holy : Scenes in Mohammedan Africa / by Alexander A. Boddy ; illustrated by A. F. Jacassey
Pubbl/distr/stampa	London, : Darf Publishers, 1985
ISBN	18-507-7069-7
Edizione	[New impression]
Descrizione fisica	xiv, 275 p., c. di tav. ; 20 cm
Disciplina	916.1104
Soggetti	KAIRWAN Tunisia - Descrizioni e viaggi
Lingua di pubblicazione	Inglese
