Livello bibliografico	Monografia
Nota di contenuto	Decision support: a collaborative endeavor -- Decision support using models -- Nonmodeling decision-support approaches -- Alignment between policy questions and decision-support approaches -- Recommendations and discussion.
Sommario/riassunto	This report provides an overview of decision-support tools, including models and nonmodeling approaches, to inform both modelers and policymakers. It offers ways to use these tools to help address real-world policy questions related to infectious disease prevention, detection, control, and response and recommends best practices for technical experts and policymakers to collaborate in developing and using the tools.
