Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Background -- Prevention : universal and targeted approaches -- ICTs in the clinical process -- Conclusions and recommendations.
Sommario/riassunto	The dramatic evolution in information and communication technologies (ICTs) online and on smartphones has led to rapid innovations in behavioral health care. To assist the U.S. Air Force in developing a strategy for use of ICTs, the authors reviewed the scientific literature on applications of ICTs to prevent and treat behavioral health conditions.
