Candidate Set of Measures of Quality of Care for Posttraumatic Stress Disorder; F. Candidate Set of Measures of Quality of Care for Major Depressive Disorder; G. Sources of Measures; Bibliography

Sommario/riassunto

To inform improvements to the quality of care delivered by the military health system for posttraumatic stress disorder and major depressive disorder, researchers developed a framework and identified, developed, and described a candidate set of measures for monitoring, assessing, and improving the quality of care. This document describes their research approach and the measure sets that they identified.
