

1. Record Nr.	UNINA9910220148703321
Autore	Keller Kirsten M.
Titolo	Facilitating information sharing across the international space community : lessons from behavioral sciences
Pubbl/distr/stampa	RAND Corporation, 2013 [Place of publication not identified], : Rand, 2013
ISBN	0-8330-8324-4
Descrizione fisica	1 online resource
Disciplina	363.12/472
Soggetti	Space debris - International cooperation Communication - International cooperation Mechanical Engineering Engineering & Applied Sciences Aeronautics Engineering & Astronautics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Abbreviations -- Introduction -- Objective and methodology -- Barriers to information sharing -- Cooperative motives in a competitive environment -- Trust -- Knowledge as a public good -- Cross-cultural differences -- The role of individual perceptions -- Conclusions and recommendations -- Recommendations -- Additional considerations.
Sommario/riassunto	Space debris is a growing threat that will increasingly affect future space-related missions. The space community would benefit from sharing information, but its members are not always willing to do so. This report examines some of the potential behavioral and psychological barriers that may prevent information sharing and suggests ways the U.S. Air Force might be able to facilitate improved information sharing among space-faring entities.
