

1. Record Nr.	UNINA9910220155503321
Autore	Lorell Mark A
Titolo	Do joint fighter programs save money? : technical appendixes on methodology
Pubbl/distr/stampa	[Place of publication not identified], : Rand Corporation, 2013
ISBN	0-8330-8487-9
Soggetti	F-35 (Military aircraft) - Costs - United States Fighter planes Life cycle costing Military & Naval Science Law, Politics & Government Air Forces
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Appendix A: Calculation of Theoretical Maximum Joint Aircraft Acquisition Program Savings -- Appendix B: Calculation of the Joint Acquisition Cost-Growth Premium from Historical Aircraft Programs -- Appendix C: Calculation of Maximum Joint O&S Savings from an "Ideal" Joint Fighter Program -- Appendix D: Exploring the Magnitude of Joint O&S Savings Needed to Offset Joint Acquisition Cost-Growth Premium -- Appendix E: Primary Methodology for Comparing JSF Costs with Those of Three Notional Single-Service Fighters -- Appendix F: Alternative Procurement Methodology and Results for Comparing JSF Costs with Those of Three Notional Single-Service Fighters.
Sommario/riassunto	These appendixes explain the methodology used in an analysis of the costs and savings of joint aircraft acquisition programs. They illustrate calculations for theoretical maximum savings in acquisition and in operations and support, historical joint aircraft cost-growth premiums, savings needed to offset premiums, and two cost-comparison methodologies.
