Nota di contenuto	Preface --I. WRR-lecture, 22 November 2007 --The fate of knowledge in science, politics and society --How to think like a state --35th anniversary speech --On governing and thinking ahead as a service to democracy --II. Workshops, 23 November 2007 --Introduction -- Truth, authority and policy in the twenty-first century --Crafting the past on the future: realistic visions and futuristic nightmares? --How the European Commission deals with ideas and knowledge --Truth and trust: irreducible dilemmas of scientific advice to policymaking --About the authors
Sommario/riassunto	Is a state capable of thinking, and how can it be supported in doing so? Which developments in society and science influence the relationship between policy and politics? How can learning be encouraged in a democracy, and what do we really mean when we say that democracy cannot exist without learning? Finally, under which conditions can scientists contribute to the quality and future-proofing of government policy?
