Sommario/riassunto

This unique, fully photocopiable resource offers guidance and materials to aid those developing multisensory environments - artificially engineered spaces that encourage relaxation, social skills and learning by stimulating the five senses. Particularly useful for those working with people with multiple disabilities, this resource explains the theory underlying multisensory environments, describes the different types, and outlines the practicalities of planning, setting up and equipping a multisensory space. The resource also features useful checklists and tools for creating multisensory exper

Sommario/riassunto

Because our chemical environment affects our physical and mental well-being, it is a matter of increasing concern and is therefore attracting much research effort. This timely collection of essays highlights current developments in the field of environmental toxicology. Chapters analyze the carcinogenic, mutagenic, genotoxic, and neurotoxic effects of both anthropogenic and natural toxins in the soil, air, and water around us, as well as in our workplace and diet. The book also examines the effects of toxins on other organisms, as well as the techniques, policies, and management strategies emp
