Sommario/riassunto

Environmental Risks and the Media explores the ways in which environmental risks, threats and hazards are represented, transformed and contested by the media. At a time when popular conceptions of the environment as a stable, natural world with which humanity interferes are being increasingly contested, the medias methods of encouraging audiences to think about environmental risks - from the BSE or 'mad cow' crisis to global climate change - are becoming more and more controversial. Examining large-scale disasters, as well as 'everyday' hazards, the contributors consider the tensi
