

1. Record Nr.	UNINA9910224368203321
Titolo	IEEE Std C37.21-2017 (Revision of IEEE Std C37.21-2005) - Redline: : IEEE Standard for Control Switchboards / / IEEE
Pubbl/distr/stampa	New York, USA : , : IEEE, , 2017
ISBN	1-5044-4467-1
Descrizione fisica	1 online resource (55 pages)
Disciplina	621.3173
Soggetti	Electric switchgear - Standards Electrical engineering - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Ratings, construction, and testing of dead-front control switchboards containing, but not limited to, devices such as switches, control devices, instrumentation, metering, monitoring, alarms, annunciators, protective and auxiliary relays, and regulating devices and accessories are covered in this standard. It includes, but is not specifically limited to, switchboards for the control and protection of apparatus used for or associated with power generation, conversion, transmission, and distribution. Types of switchboards may include control, vertical, dead-front, enclosed, dual, or duplex switchboards. Other construction types include control desks, consoles, benchboards, dual or duplex benchboards, fixed rack, cabinet, and swing rack cabinets. It does not apply to industrial controls, communication equipment, switchboards for use on board ships, or Class 1E switchboards for use in nuclear generating stations.
