

1. Record Nr.	UNINA9910247453603321
Titolo	2017 International Electronics Symposium on Knowledge Creation and Intelligent Computing (IES-KCIC) // Institute of Electrical and Electronics Engineers (IEEE) Staff
Pubbl/distr/stampa	Piscataway, New Jersey : , : Institute of Electrical and Electronics Engineers (IEEE), , 2017
ISBN	1-5386-0716-6
Descrizione fisica	1 online resource (various pagings) : illustrations
Disciplina	006.3
Soggetti	Computational intelligence Expert systems (Computer science)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Communication Networks and Future Internet Technologies, Information & Communication Theory, and Their Applications, Mobile Edge Computing, Virtualization, Cyber Physical Systems, Internet of Things, Internet of Everything, Big Data and Machine Learning, Cyber Security, Speech, audio, image, video, text and new sensor signal processing for media, integration, 3D data graphics, displays, sound, broadcasting, interfaces, Media composition and production capture, authoring, digital art, animations, Virtual and Augmented Reality, Interdisciplinary smart media applications Bioinformatics, Transportation systems, Wildlife monitoring and analysis, Environment Computing and Support Systems, Deep Learning for Multimedia Data, Knowledge and data engineering aspects of knowledge based and expert systems, Artificial Intelligence techniques relating to knowledge and data management, Future Direction of Knowledge Creation Systems, Database design and modeling.
