

1. Record Nr.	UNINA9910249953403321
Titolo	Global gap analysis : towards a representative network of protected areas / / Ana S. L. Rodrigues [and others]
Pubbl/distr/stampa	Washington, DC : , : Center for Applied Biodiversity Science at Conservation International, , 2003
ISBN	9781934151143
Descrizione fisica	1 online resource
Collana	Advances in applied biodiversity science; ; 5.
Soggetti	Protected areas Biodiversity conservation Natural areas - Planning
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (pages) and index.
Nota di contenuto	Acknowledgements To the reader Global gap analysis - executive summary Introduction Data Methods Results and discussion Final conclusions
Sommario/riassunto	The Global Gap Analysis is the first study to use species diversity to identify the need for new protected areas. The report suggests that while current protected areas cover many species in need of protection and the amount of land required to produce a more comprehensive system is very small, the global network of protected areas is far from complete.
