Livello bibliografico	Monografia
Nota di contenuto	Introduction: Networked Governance: Taking Networks Seriously -- Part I: Networked Governance: General Issues -- Part II: Types, Processes and Limits of Networked Governance -- Part III: Investigating Networked Governance: Methodological Approaches -- Part IV: Conclusions.
Sommario/riassunto	This edited volume seeks to explore established as well as emergent forms of governance by combining social network analysis and governance research. In doing so, contributions take into account the increasingly complex forms which governance faces, consisting of different types of actors (e.g. individuals, states, economic entities, NGOs, IGOs), instruments (e.g. law, suggestions, flexible norms) and arenas from the local up to the global level, and which more and more questions theoretical models that have focused primarily on markets and hierarchies. The topics addressed in this volume are processes of coordination, arriving at and implementing decisions taking place in

network(ed) (social) structures; such as governance of work relations, of financial markets, of innovation and politics. These processes are investigated and discussed from sociologists', political scientists' and economists' viewpoints.
