Soggetti	Presbyterian Church - North Carolina - History Christian sects - North Carolina - History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Old World origins and New World horizons -- Atlantic world bonds and backcountry settlers -- Revivalism, reform, and rancor in the antebellum Piedmont -- Limited and late -- Both read the same Bible and prayed to the same God -- Out from the gloomy past -- Rebuilding in the era of the new South -- A new church in a new era.
Sommario/riassunto	This volume is the first comprehensive overview of North Carolina Presbyterians to appear in more than a hundred years. Drawing on congregational and administrative histories, personal memoirs, and recent scholarship-while paying close attention to the relevant social, political, and religious contexts of the state and region-Walter Conser and Robert Cain go beyond older approaches to denominational history by focusing on the identity and meaning of the Presbyterian experience in the Old North State from the seventeenth through the twentieth centuries. Conser and Cain

Getting to Groundbreaking, But No Further: Network Failure in a Housing Indicators Collaborative; Meg Holden and Daniel Sturgeon -- Chapter 8. Community Indicators and the Collective Goods Criterion for Impact; Frank Ridzi.

Sommario/riassunto

This book is the seventh volume in a series covering best practices in community quality of life indicators. The case studies and analysis in this volume demonstrate how community indicators projects today operate within a need to amplify the voice of disadvantaged communities, seriously explore the increasing use of information technology, produce positive community change and sustain these efforts over time. The work presented here spans North American and Australian community work and demonstrates how the field of community indicators has undergone a rapid evolution in only a few decades. Today as in their original formulations, community indicators projects are designed to gauge the social, economic and physical health and well-being of communities. .
