

1. Record Nr.	UNINA9910252724203321
Autore	Landström Catharina
Titolo	Transdisciplinary Environmental Research : A Practical Approach / / by Catharina Landström
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2017
ISBN	9783319628462 3319628461
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (116 pages) : illustrations
Disciplina	363.705
Soggetti	Environmental sciences - Social aspects Environmental policy Sociology - Methodology Physical geography Water Hydrology Environmental Social Sciences Environmental Policy Sociological Methods Physical Geography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Introduction: Transdisciplinary Environmental Engagement -- 2. The Professors -- 3. The Post Docs -- 4. The Mixed Encounter -- 5. Conclusion: How Does Transdisciplinary Practice Make a Difference?
Sommario/riassunto	This book explores the practice of transdisciplinary research through the narratives of different individuals taking part in a project investigating local water management. The research project ran for one year and brought seven university scientists together with seven local residents to explore relationships between water quantity, water quality, abstraction of water resources and how to reduce pollution. Landström presents three conversations that convey the experience of transdisciplinary practice in natural language in order to offer insights

into the workings of a transdisciplinary Environmental Competency Group. The conversations highlight Environmental Competency Groups as tools enabling collaboration between knowledgeable individuals who do not share a common scientific vocabulary. Transdisciplinary Environmental Research will appeal to natural and social scientists interested in working collaboratively with each other and the general public on environmental research projects.
