Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (74 pages) : colour illustrations
Collana	SpringerBriefs in Criminology, , 2192-8541
Disciplina	307.3366
Soggetti	Criminology Developmental psychology Public administration Developmental Psychology Public Administration
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction to Criminal Careers -- Official Criminal Careers -- Self-Reported Criminal Careers -- Trajectories of Offending to Age 30 -- Conclusions -- Appendix.
Sommario/riassunto	This Brief examines criminal careers by providing the most extensive and comprehensive investigation to date on the official offending, self-reported offending, and trajectories of offending of the Pittsburgh Youth Study (PYS) participants. The PYS is a longitudinal study, which was initiated in 1987, and involves repeated follow-ups on several community cohorts (starting in grades 1, 4, and 7) of inner-city boys in Pittsburgh, Pennsylvania. This Brief covers the Youngest and Oldest PYS cohorts (which had the most follow-up and most data available) from ages 10-30. It provides the most complete descriptive analyses of the criminal careers of these males to date. The three cohorts are commonly referred to as the Youngest, Middle, and Oldest cohorts, respectively. Consistent with several prior publications with the PYS data (Loeber et al., 2008), this book focuses only on data from the Youngest and Oldest cohorts as these cohorts were followedup the

most frequently and have the longest time window of data available. It will be of interest to researchers in Criminology and Criminal Justice, as well as related fields like Sociology, Developmental Psychology, Social Policy, and Education.
