

1. Record Nr.	UNISA996391723603316
Titolo	A musicall banquet [[electronic resource] ] : Furnished with varietie of delicious ayres, collected out of the best authors in English, French, Spanish and Italian. By Robert Douland
Pubbl/distr/stampa	London, : Printed [by Thomas Snodham] for Thomas Adams, 1610
Descrizione fisica	[46] p. : music
Altri autori (Persone)	DowlandRobert <ca. 1586-1641.>
Soggetti	Songs with lute Songs with instrumental ensemble
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Printer's name from STC. Signatures: A-MÂ <sup>2</sup> (-M2). Reproduction of the original in the Library of Congress. Some print show-through.
Sommario/riassunto	eebo-0078

2.	Record Nr.	UNIORUON00039287
	Autore	Flood, Gavin
	Titolo	An Introduction to hinduism / Gavin Flood
	Pubbl/distr/stampa	Cambridge, : Cambridge University Press, 1996
	ISBN	05-214-3878-0
	Descrizione fisica	XVIII, 341 p., p. di tav. ; 23 cm
	Classificazione	SI VII A
	Soggetti	HINDUISMO
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
3.	Record Nr.	UNINA9910253930703321
	Autore	Apostolou Menelaos
	Titolo	Sexual Selection in Homo sapiens : Parental Control over Mating and the Opportunity Cost of Free Mate Choice / / by Menelaos Apostolou
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
	ISBN	3-319-58999-7
	Edizione	[1st ed. 2017.]
	Descrizione fisica	1 online resource (XXI, 189 p.)
	Disciplina	576.8
	Soggetti	Evolution (Biology) Psychobiology Human behavior Physical anthropology Sex (Psychology) Sociology Social groups Evolutionary Biology Behavioral Neuroscience Physical-Biological Anthropology Psychology of Gender and Sexuality Sociology of Family, Youth and Aging

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Chapter 1: Sexual Selection Forces -- Chapter 2: Parent-Offspring Conflict over Mating -- Chapter 3: The Model of Parental Choice -- Chapter 4: Sexual Selection under Parental Choice in Hunting and Gathering Societies -- Chapter 5: Sexual Selection under Parental Choice in Agropastoral Societies -- Chapter 6: Sexual Selection under Parental Choice in Post-Industrial Societies -- Chapter 7: Sexual Selection under Parental Choice Across Societies and Across Time -- Chapter 8: Variation in the Strength of Parental Choice within and Between Societies of the Same Subsistence Type -- Chapter 9: In-law Preferences: What Parents Want in a Prospective Daughter- And Son-in-Law -- Chapter 10: Parental Choice and Its Impact on Adaptations Involved in Mating -- Chapter 11: Environmental Mismatches and Mating Effectiveness.
Sommario/riassunto	<p>The present book aims to examine how sexual selection works in the human species. Almost all scholarly effort focuses on sexual selection in non-human species and extrapolates the findings to the human one. However, human mating has a unique pattern not found in any other species, namely parental influence over mate choice. Across preindustrial societies, the typical pattern of long-term mating is arranged marriage, where parents choose spouses for their children. By doing so, parents effectively become a sexual selection force. Traits that enhance an individual's chance to be selected as a son- or a daughter-in-law confer important reproductive advantages to those who are endowed with them, increasing in frequency in the population. The author has coined the term parental choice to describe the sexual selection force that arises from parental control over mating. He synthesizes extensive theoretical and empirical work in order to understand and model this force. The aim is to understand which factors give rise to parental choice and to combine these insights into constructing a more formal model. It also aims to further examine whether the predictions of the model fit the patterns of mating found across different types of human societies, and how the model can be used to understand the evolution of behavioral traits involved in mating. By synthesizing the various arguments put forward and published across the literature, the book offers a comprehensive argument and overview of an aspect of sexual selection unique to our species. Furthermore, the book revises and extends previously made arguments and models, while it provides useful insights on how the proposed revision of sexual selection theory can enable us to understand a wide range of human behavioral phenomena. It should be key reading for those interested in studying sexual selection in general and in the Homo sapiens species in particular. .</p>
