Autore	Nowotny Helga
Titolo	Insatiable curiosity : innovation in a fragile future / / by Helga Nowotny ; translated by Mitch Cohen
Pubbl/distr/stampa	Cambridge, MA, : MIT Press, ©2008
ISBN	0-262-28076-0 1-4356-5497-8
Descrizione fisica	1 online resource (195 p.)
Collana	Inside technology
Disciplina	303.48/3
Soggetti	Science - Social aspects Technology - Social aspects Science - Technological innovations Technological innovations Curiosity Creative ability in science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [169]-179).
Nota di contenuto	Contents; 1 The Emergence of the New; 2 Paths of Curiosity; 3 Innovation in a Fragile Future; Epilogue Why We Must Remain Modern; Notes
Sommario/riassunto	An influential scholar in science studies argues that innovation tames the insatiable and limitless curiosity driving science, and that society's acute ambivalence about this is an inevitable legacy of modernity. Curiosity is the main driving force behind scientific activity. Scientific curiosity, insatiable in its explorations, does not know what it will find, or where it will lead. Science needs autonomy to cultivate this kind of untrammelled curiosity; innovation, however, responds to the needs and desires of society. Innovation, argues influential European science studies scholar Helga Nowotny, tames the passion of science, harnessing it to produce "deliverables." Science brings uncertainties; innovation successfully copes with them. Society calls for both the passion for knowledge and its taming. This ambivalence, Nowotny contends, is an inevitable result of modernity. In <i>Insatiable Curiosity</i> , Nowotny explores the strands of the often unexpected intertwining of

science and technology and society. Uncertainty arises, she writes, from an oversupply of knowledge. The quest for innovation is society's response to the uncertainties that come with scientific and technological achievement. Our dilemma is how to balance the immense but unpredictable potential of science and technology with our acknowledgement that not everything that can be done should be done. We can escape the old polarities of utopias and dystopias, writes Nowotny, by accepting our ambivalence--as a legacy of modernism and a positive cultural resource.

### Sommario/riassunto

This book examines energy security as one of nontraditional issues that are strategic for Indonesia's foreign policy. It argues that energy has not been considered as a strategic commodity in the foreign policy to support the effectiveness of Indonesia's diplomacy at the regional and international levels. International and outward looking perspectives have not been much visible both in the policy and political realities. Since foreign policy is a reflection of domestic politics under the influence of international developments, this study focuses its analysis on the domestic and international aspects of the energy security issues.
