Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley : , : IEEE Press, , [2021] ©2021
ISBN	1-119-69547-3 1-119-81903-2 1-119-69549-X
Descrizione fisica	1 online resource (595 pages)
Collana	IEEE Press series on power and energy systems
Disciplina	621.31921
Soggetti	Transients (Electricity) - Simulation methods Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.

Sommario/riassunto	This book presents recent findings on the global existence, the uniqueness and the large-time behavior of global solutions of thermo (vis)coelastic systems and related models arising in physics, mechanics and materials science such as thermoviscoelastic systems, thermoelastic systems of types II and III, as well as Timoshenko-type systems with past history. Part of the book is based on the research conducted by the authors and their collaborators in recent years. The book will benefit interested beginners in the field and experts alike.
