

1. Record Nr.	UNINA9910254134203321
Titolo	Climate Change Policies and Challenges in Indonesia / / edited by Shinji Kaneko, Masato Kawanishi
Pubbl/distr/stampa	Tokyo : , : Springer Japan : , : Imprint : Springer, , 2016
ISBN	4-431-55994-9
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (331 p.)
Disciplina	551.6
Soggetti	Environmental management Environmental economics Climatic changes Environmental Management Environmental Economics Climate Change/Climate Change Impacts Indonesia
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Foreword -- Preface -- PART I: Climate Change, Policies and Institutions -- PART II: Climate Change Sectoral Challenges.
Sommario/riassunto	This book demonstrates the challenges and opportunities of climate change actions in developing countries and primarily focuses on case studies in Indonesia, the world's fourth most populous country. The most important feature of the book is its examination of multiple facets of climate change issues in Indonesia, which allows readers to understand the complexity of climate change in developing countries: the synergies and trade-offs between different climate change actions as well as between climate and development priorities. Another unique feature is that it was jointly written by Indonesian and international authors, as well as by academics and development practitioners. This book addresses questions concerning mitigation measures in major sectors with original analyses of aspects including energy subsidies, sectoral energy efficiencies in manufacturing sectors, forest concessions, energy-saving labeling schemes, policy mixes for the urban transportation sector, and the introduction of waste-to-energy

technologies. The book provides first-hand knowledge and data on energy and the institutional realities in Indonesia, which are not widely and readily available to an international audience. It offers a valuable reference guide for professionals working for governments and NGOs and donor agencies in the fields of climate change and development in developing countries. This work is also a valuable resource for undergraduate and graduate students of economics and environmental and development studies, in particular those who are interested in the synergies and conflicts between climate change and development. .
