1. Record Nr. UNINA9910254160003321

Titolo	Alzheimer’s Disease II / / edited by Michael S. Wolfe
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-59460-5
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (VII, 202 p. 90 illus., 33 illus. in color.)
Collana	Topics in Medicinal Chemistry, , 1862-2461 ; ; 24
Disciplina	616.831
Soggetti	Medicinal chemistry Pharmaceutical technology Proteins Neurosciences Medicinal Chemistry Pharmaceutical Sciences/Technology Receptors
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Targets and Strategies Toward the Development of Alzheimer Therapeutics -- The Design, Development, and Evaluation of BACE1 Inhibitors for the Treatment of Alzheimer’s Disease -- -Secretase Modulators as A42-Lowering Pharmacological Agents to Treat Alzheimer’s Disease -- Inhibitors of Tau-Phosphorylating Kinases -- Microtubule-Stabilizing Agents for Alzheimer’s and Other Tauopathies -- PET Imaging Agents for Alzheimer’s Disease.
Sommario/riassunto	Medicinal chemistry is both science and art. The science of medicinal chemistry offers mankind one of its best hopes for improving the quality of life. The art of medicinal chemistry continues to challenge its practitioners with the need for both intuition and experience to discover new drugs. Hence sharing the experience of drug research is uniquely beneficial to the field of medicinal chemistry. Drug research requires interdisciplinary team-work at the interface between chemistry, biology and medicine. Therefore, the topic-related series Topics in Medicinal Chemistry covers all relevant aspects of drug

research, e.g. pathobiochemistry of diseases, identification and validation of (emerging) drug targets, structural biology, drugability of targets, drug design approaches, chemogenomics, synthetic chemistry including combinatorial methods, bioorganic chemistry, natural compounds, high-throughput screening, pharmacological in vitro and in vivo investigations, drug-receptor interactions on the molecular level, structure-activity relationships, drug absorption, distribution, metabolism, elimination, toxicology and pharmacogenomics. In general, special volumes are edited by well known guest editors .
