Titolo	Office based anesthesia complications : prevention, recognition and management // Gary F. Bouloux (editor)
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] Â©2021
ISBN	3-030-61427-1
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (X, 149 p. 58 illus., 53 illus. in color.)
Disciplina	617.96041
Soggetti	Anesthesia - Complications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	This book is based on a review of the closed claims from the Oral and Maxillofacial Surgery Insurance Company (OMSNIC). Themes and trends that have been identified through review of these claims assisted in recognizing multiple causes of anesthesia related complications. This allowed the development of a presentation on the prevention, recognition and management of office based anesthesia complications to be delivered over 10 years to thousands of oral and maxillofacial surgeons in an attempt to reduce the incidence of future complications. This text provides detailed methods to allow the oral and maxillofacial surgeon, anesthetist and anesthesiologist to risk stratify patients as well as prevent, recognize and manage the most common anesthesia related complications. Additionally, it describes how to run an ideal Advanced Cardiac Life Support (ACLS) driven megacode, identify differences in pediatric anesthesia and ideally manage opioid needs of the oral and maxillofacial surgery patient. Office Based Anesthesia Complications is based on the most common anesthesia related complications that have been documented over more than 20 years of data collection for Oral and Maxillofacial Surgery.

Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Decision Making and Cognition in Sports -- Analysis of Individual and Team Sports -- Health, Injury and Accidents.
Sommario/riassunto	This book describes cutting-edge applications of human factors for sport and outdoor recreation disciplines and provides practical guidance on a range of methods for describing, representing, and evaluating human, team, and system performance in sports domains. Contributions in this book show how various human factors methods, applied historically in the complex safety critical domains, are suited to describing and understanding sports performance and sports injury prevention. The book discusses a wealth of methods for different purposes, such as data collection, task analysis (including cognitive

task analysis), workload measurement, assessing situation awareness, performance assessment (including team performance assessment), decision making and cognition in sports, human error identification, and interface evaluation methods. With respect to other publications in human factors and ergonomics, which have been more focused on the biomechanical, physiological, environmental, and equipment-related aspects of sports performance, this book gives a special emphasis to research on analysis of individual and team sports, cognitive and social human factors, and covers both sports and outdoor recreation disciplines. Based on the AHFE 2016 International Conference on Human Factors in Sports and Outdoor Recreation, held on July 27-31, 2016, in Walt Disney World®, Florida, USA, this book provides readers with a timely survey of new methods that can be implemented during any sport or outdoor recreation event for analyzing and improving the performance and safety of both individuals and teams.
