

1. Record Nr.	UNINA9910254186703321
Titolo	Recent Advances in Computational Intelligence in Defense and Security // edited by Rami Abielmona, Rafael Falcon, Nur Zincir-Heywood, Hussein A. Abbass
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2016
ISBN	9783319264509 3319264508
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (XI, 752 p. 236 illus., 72 illus. in color.)
Collana	Studies in Computational Intelligence, , 1860-949X ; ; 621
Disciplina	006.3
Soggetti	Computational intelligence Artificial intelligence System safety Computational Intelligence Artificial Intelligence Security Science and Technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Part I Physical Security and Surveillance -- Part II: Cyber Security and Intrusion Detection Systems -- Part III: Biometric Security and Authentication Systems -- Part IV: Situational Awareness and Threat Assessment -- Part V: Strategic/Mission Planning and Resource Management.
Sommario/riassunto	This volume is an initiative undertaken by the IEEE Computational Intelligence Society's Task Force on Security, Surveillance and Defense to consolidate and disseminate the role of CI techniques in the design, development and deployment of security and defense solutions. Applications range from the detection of buried explosive hazards in a battlefield to the control of unmanned underwater vehicles, the delivery of superior video analytics for protecting critical infrastructures or the development of stronger intrusion detection systems and the design of military surveillance networks. Defense scientists, industry experts, academicians and practitioners alike will all benefit from the wide

spectrum of successful applications compiled in this volume. Senior undergraduate or graduate students may also discover uncharted territory for their own research endeavors.
