1.	Record Nr.	UNINA9910254197903321
	Autore	Arghode Vaibhav K
	Titolo	Air Flow Management in Raised Floor Data Centers / / by Vaibhav K. Arghode, Yogendra Joshi
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2016
	ISBN	3-319-25892-3
	Edizione	[1st ed. 2016.]
	Descrizione fisica	1 online resource (90 p.)
	Collana	SpringerBriefs in Thermal Engineering and Applied Science, , 2193-2530
	Disciplina	697.9316
	Soggetti	Facility management
		Energy efficiency
		Thermodynamics
		Heat engineering
		Heat transfer
		Mass transfer
		Computer hardware
		Facility Management
		Energy Efficiency
		Engineering Thermodynamics, Heat and Mass Transfer
		Computer Hardware
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	1. Introduction -- 2. Metrology Tools -- 3. Cooling Air Delivery Through Perforated Tiles -- 4. Cold Aisle Containment -- 5. Other Air Delivery Schemes.
	Sommario/riassunto	The Brief discuss primarily two aspects of air flow management in raised floor data centers. Firstly, cooling air delivery through perforated tiles will be examined and influence of the tile geometry on flow field development and hot air entrainment above perforated tiles will be discussed. Secondly, the use of cold aisle containment to physically separate hot and cold regions, and minimize hot and cold air mixing will be presented. Both experimental investigations and computational efforts are discussed and development of computational fluid dynamics

(CFD) based models for simulating air flow in data centers is included. In addition, metrology tools for facility scale air velocity and temperature measurement, and air flow rate measurement through perforated floor tiles and server racks are examined and the authors present thermodynamics-based models to gauge the effectiveness and importance of air flow management schemes in data centers.
