Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	What is the use of research in public debates and policy-making on immigration and integration? Why are there such large gaps between migration debates and migration realities, and how can they be reduced? 'Bridging the Gaps' provides a unique set of testimonies and analyses of these questions by researchers and policy experts who have been deeply involved in attempts to link social science research to public policies. 'Bridging the Gaps' argues that we must go beyond the prevailing focus on the research-policy nexus by considering how the media, public opinion, and other dimensions of public debates can interact with research and policy-processes.
3. Record Nr.	UNINA9910705745703321
Autore	Gordon Mackenzie <1913->
Titolo	Early Pennsylvanian ammonoids from southern Nevada / / by Mackenzie Gordon, Jr
Pubbl/distr/stampa	Washington : , : United States Department of the Interior, Geological Survey, , 1969
Descrizione fisica	1 online resource (iii, C13 pages) : illustrations, map
Collana	Geological Survey professional paper ; ; 613-C Contributions to paleontology

Sommario/riassunto

This book highlights the recent advances in nanotheranostics from basic research to potential applications, and discusses the modular design and engineering of multiplex nanoparticles including gold nanostructures, luminescent nanoparticles, dendrimers and liposomes. Each chapter demonstrates multifunctional nanoparticles with topics covering targeting, imaging, delivery, diagnostics, and therapy as new

modalities for cancer theranostics. This comprehensive book presents expert views on the latest developments in theranostic nanomedicine. It focuses on potential theranostic applications of multifunctional nanoparticles ranging from identifying noninvasively cancer cells by molecular detection, and visualizing in vivo drug delivery by means of contrast enhanced imaging, to destroying cancer cells with minimal side effects via selective accumulation at tumor sites, and real-time monitoring therapeutic effectiveness. It also presents an interdisciplinary survey of nanotheranostics and as such is a valuable resource for researchers and students in related fields. Zhifei Dai is a Professor at the Department of Biomedical Engineering, College of Engineering, Peking University, China.

Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Cet ouvrage est l'aboutissement d'un dialogue franco-russe en philosophie, qui a été développé pendant plusieurs années (2010-2015) sous la direction de Maryse Dennes dans le cadre d'un programme de recherche de la MSHA et à travers des séminaires et des colloques organisés à Bordeaux, Paris, Moscou, Jérusalem, et Cerisy. La participation assidue de François Laruelle à toutes ces manifestations scientifiques a conduit les chercheurs russes et français engagés dans ce dialogue à faire de son œuvre la pierre angulaire de leurs réflexions communes. L'ouvrage permet de présenter un panorama de la philosophie russe actuelle en y repérant les auteurs, les thèmes ou les orientations qui la rendent particulièrement apte à recevoir la pensée laruellienne. La non-philosophie vs Quantique se trouve présentée, par François Laruelle et ses plus proches collaboratrices, dans la dernière étape de son développement : à partir de l'epistemologie générique, elle s'ouvre sur la messianité et la musique, et offre ainsi un accès privilégié à la philosophie russe, en y trouvant d'étonnantes résonnances et de nouvelles voies d'interprétation.</p>
