

1. Record Nr.	UNINA9910915500603321
Autore	Gazier, Augustin
Titolo	Études sur l'histoire religieuse de la révolution française d'après des documents originaux et inédits : depuis la réunion des États généraux jusqu'au Directoire / par A. Gazier
Pubbl/distr/stampa	Paris, : A. Colin et C.ie, 1887
Descrizione fisica	XI, 424 p. ; 18 cm.
Locazione	FLFBC
Collocazione	DAM D52.1 GAZA 01
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910254201403321
Titolo	Advances in Control System Technology for Aerospace Applications / / edited by Eric Feron
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2016
ISBN	3-662-47694-0
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (XII, 180 p. 75 illus., 65 illus. in color.)
Collana	Lecture Notes in Control and Information Sciences, , 0170-8643 ; ; 460
Disciplina	629.1326
Soggetti	Automatic control Aerospace engineering Astronautics Control and Systems Theory Aerospace Technology and Astronautics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph

Nota di contenuto

Spacecraft Autonomy Challenges for Next-Generation Space Missions
-- New Guidance, Navigation and Control Technologies for Formation Flying Spacecraft and Planetary Landing -- Aircraft Autonomy -- Challenges in Aerospace Decision & Control: Air Transportation Systems -- From Design to Implementation: an Automated, Credible Auto coding Chain for Control Systems.

Sommario/riassunto

This book is devoted to Control System Technology applied to aerospace and covers the four disciplines Cognitive Engineering, Computer Science, Operations Research, and Servo-Mechanisms. This edited book follows a workshop held at the Georgia Institute of Technology in June 2012, where the today's most important aerospace challenges, including aerospace autonomy, safety-critical embedded software engineering, and modern air transportation were discussed over the course of two days of intense interactions among leading aerospace engineers and scientists. Its content provide a snapshot of today's aerospace control research and its future, including Autonomy in space applications, Control in space applications, Autonomy in aeronautical applications, Air transportation, and Safety-critical software engineering.
