Sommario/riassunto	This volume is a selected collection of papers presented and discussed at the International Conference "Advanced Computing for Innovation (AComIn 2015)". The Conference was held at 10th -11th of November, 2015 in Sofia, Bulgaria and was aimed at providing a forum for international scientific exchange between Central/Eastern Europe and the rest of the world on several fundamental topics of computational intelligence. The papers report innovative approaches and solutions in hot topics of computational intelligence – advanced computing, language and semantic technologies, signal and image processing, as well as optimization and intelligent control.

Sommario/riassunto	Imperial frontiers have been a topic of research and a source of fascination for decades. This volume deals with the Carolingian Empire, particularly Italy, collecting fifteen essays on the military, economic and social function of the frontier; how it was ideologically conceived and physically realized from Saxony to Catalonia across the Alps and the Danube. In a rich diversity of perspectives and themes, the concept of frontier is used in its political, ideological, normative, and cultural meanings. Aim of the volume is to offer a comprehensive picture of Carolingian frontiers against the background of the broad debate on empires and frontiers.
