

1. Record Nr.	UNINA9910254265803321
Autore	Pérez-Riera Andrés R
Titolo	Left Septal Fascicular Block : Characterization, Differential Diagnosis and Clinical Significance // by Andrés R. Pérez-Riera, Raimundo Barbosa-Barros, Adrian Baranchuk
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2016
ISBN	3-319-27359-0
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (163 p.)
Disciplina	610
Soggetti	Cardiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Chapter 1: -- Chapter 2: Ventricular activation -- Chapter 3: Definition of diagnosis -- Chapter 4: LSFBC ECG/VCG examples -- Chapter 5: Final conclusions.
Sommario/riassunto	This book provides clinical and electrovectorcardiographic evidence of the existence of left septal fascicular blocks and demonstrates the clinical importance of these blocks in the clinical scenario of acute coronary syndrome. There are currently no standard criteria for detecting conduction defects involving the third left fascicle, the septal or median fascicle, and the very existence of such defects is still a matter of controversy. This book provides acceptable and consistent terminology and definitions for the electrovectorcardiographic diagnosis of a left septal fascicular block. Left Septal Fascicular Block: Characterization, Differential Diagnosis and Clinical Significance is an original and unique book that sheds light on an important topic of discussion in cardiac electrophysiology.
