

1. Record Nr.	UNINA9910254296303321
Autore	Pukelsheim Friedrich
Titolo	Proportional Representation : Apportionment Methods and Their Applications // by Friedrich Pukelsheim
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-64707-5 9783319647074
Edizione	[2nd ed. 2017.]
Descrizione fisica	1 online resource (xxvii., 342 p.) : ill
Classificazione	10.08.12.08
Disciplina	328.3347
Soggetti	Game theory Social sciences - Statistical methods Political science Game Theory Statistics in Social Sciences, Humanities, Law, Education, Behavioral Sciences, Public Policy Political Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Exposing Methods: The 2014 European Parliament Elections.- Imposing Constitutionality: The 2009 Bundestag Election -- From Reals to Integers: Rounding Functions and Rounding Rules.- Divisor Methods of Apportionment: Divide and Round -- Quota Methods of Apportionment: Divide and Rank -- Targeting the House Size: Discrepancy Distribution -- Favoring Some at the Expense of Others: Seat Biases -- Preferring Stronger Parties to Weaker Parties: Majorization -- Securing System Consistency: Coherence and Paradoxes -- Appraising Electoral Equality: Goodness-of-Fit Criteria -- Tracing Peculiarities: Vote Thresholds and Majority Clauses. - Truncating Seat Ranges: Minimum-Maximum Restrictions. - Proportionality and Personalization: BWG 2013 -- Representing Districts and Parties: Double Proportionality -- Double-Proportional Divisor Methods: Technicalities -- Biographical Digest -- Notes and Comments -- Biographies -- References -- Index.

The book offers an in-depth study of the translation of vote counts into seat numbers in proportional representation systems – an approach guided by practical needs. It also provides plenty of empirical instances illustrating the results. It analyzes in detail the 2014 elections to the European Parliament in the 28 member states, as well as the 2009 and 2013 elections to the German Bundestag. This second edition is a complete revision and expanded version of the first edition published in 2014, and many empirical election results that serve as examples have been updated. Further, a final chapter has been added assembling biographical sketches and authoritative quotes from individuals who pioneered the development of apportionment methodology. The mathematical exposition and the interrelations with political science and constitutional jurisprudence make this an apt resource for interdisciplinary courses and seminars on electoral systems and apportionment methods.
