

1. Record Nr.	UNINA9910254349503321
Autore	Zawidzki Machi
Titolo	Discrete Optimization in Architecture [[electronic resource]] : Extremely Modular Systems // by Machi Zawidzki
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2017
ISBN	981-10-1109-5
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XIV, 121 p. 118 illus., 72 illus. in color.)
Collana	SpringerBriefs in Architectural Design and Technology, , 2199-580X
Disciplina	720.28402855369
Soggetti	Buildings—Design and construction Building Construction Engineering, Architectural Computer-aided engineering Mechanics Mechanics, Applied Regional planning Urban planning Structural materials Building Construction and Design Computer-Aided Engineering (CAD, CAE) and Design Solid Mechanics Landscape/Regional and Urban Planning Structural Materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Sommario/riassunto	This book is comprised of two parts, both of which explore modular systems: Pipe-Z (PZ) and Truss-Z (TZ), respectively. It presents several methods of creating PZ and TZ structures subjected to discrete optimization. The algorithms presented employ graph-theoretic and heuristic methods. The underlying idea of both systems is to create free-form structures using the minimal number of types of modular

elements. PZ is more conceptual, as it forms single-branch mathematical knots with a single type of module. Conversely, TZ is a skeletal system for creating free-form pedestrian ramps and ramp networks among any number of terminals in space. In physical space, TZ uses two types of modules that are mirror reflections of each other. The optimization criteria discussed include: the minimal number of units, maximal adherence to the given guide paths, etc.
