Placement of Subclavian Central Venous Catheter -- Ultrasound-Guided
 Placement of Subclavian Central Venous Catheter -- Placement of
 Internal Jugular Central Venous Catheter -- Ultrasound Guided
 Placement of Internal Jugular Central Venous Catheter -- Insertion of
 Peritoneal Dialysis Catheter -- Kidney Transplantation -- Liver
 Transplantation -- Pancreas Transplantation -- Left Adrenalectomy --
 Laparoscopic Left Adrenalectomy -- Right Adrenalectomy --
 Laparoscopic Right Adrenalectomy -- Operations for Infected
 Abdominal Wound Dehiscence and Necrotizing Soft Tissue Infection of
 the Abdominal Wall -- Pediatric Inguinal Hernia Repair -- Laparoscopic
 Pyloromyotomy -- Pediatric Laparoscopic Nissen Fundoplication --
 Ladd's Procedure for Malrotation (Laparoscopic and Open) -- Carotid
 Endarterectomy -- Carotid Endarterectomy Using the Eversion
 Technique -- Redo Carotid Endarterectomy -- Carotid Artery Balloon
 Angioplasty and Stenting -- Carotid Subclavian Bypass -- Carotid
 Subclavian Transposition -- Vertebral Artery Reconstruction --
 Subclavian Artery Angioplasty Stenting -- Aorto-Innominate Artery
 Bypass -- Innominate/Common Carotid Artery Angioplasty Stenting
 Using Hybrid Open Technique -- Antegrade Aortoceliac/Mesenteric
 Bypass for Chronic Mesenteric Ischemia -- Mesenteric Artery Stenting
 -- Celiac and SMA Stenting -- Superior Mesenteric Artery Embolectomy
 with Primary/Patch Closure for Acute Embolic Mesenteric Ischemia --
 Superior Mesenteric Artery Thrombectomy with Retrograde
 Aortomesenteric Bypass for Acute Thrombotic Mesenteric Ischemia --
 Bilateral Aortorenal Bypass -- Hepatorenal Artery Bypass -- Transaortic
 Celiac and Superior Mesenteric Artery Endarterectomy -- Transaortic
 Renal Artery Endarterectomy -- Renal Artery Angioplasty and Stenting
 -- Thoracofemoral Bypass -- Aortobifemoral Bypass -- Endovascular
 Reconstruction for Aortoiliac Occlusive Disease -- Retroperitoneal
 Aortofemoral Bypass -- Axillobifemoral Bypass -- Iliofemoral Bypass --
 Femorofemoral Bypass -- Iliac Artery Angioplasty and Stenting --
 Femoropopliteal Bypass with PTFE Graft -- Femoral Posterior Tibial
 Bypass with PTFE Graft and Adjunctive AV Fistula -- Femoroposterior
 Tibial Bypass with Reversed Greater Saphenous Vein -- Femoroanterior
 Tibial Bypass with Nonreversed Greater Saphenous Vein -- In Situ
 Femoroperoneal Bypass- Femoroplantar Composite Vein Bypass --
 Superficial Femoral Artery/Popliteal Artery/Tibial Angioplasty Stenting
 -- Retrograde Pedal Access -- Midbypass Revision -- Distal Bypass
 Revision -- Bypass Stenosis Angioplasty -- Aortic Saddle Embolus --
 Lower-Extremity Thromboembolectomy -- Upper-Extremity
 Thromboembolectomy -- Open Thoracoabdominal Aortic Aneurysm
 Repair -- Thoracic Endovascular Aortic Repair (TE).

Sommario/riassunto

This text is a fully updated and revised third edition of a highly
 successful text. The format of this text is unique and has been very
 successful. A total of 286 short chapters organized into 24 Sections
 provide operative dictation templates for all of the common and the
 vast majority of the uncommon and even rare operations performed by
 general and vascular surgeons. Each chapter also provides a succinct
 synopsis of the operation through bullet-ed lists which include
 Indications, Essential Steps, Note these Variations, and Complications.
 The book thus serves two purposes: these operative dictation templates
 can be used verbatim when dictating the operative note for a
 procedure; and the book provides ready reference to the trainee going
 into the operating room to do the procedure for the first time, or to
 someone preparing for their Board examinations. Space for notes
 allows surgeons to personalize the book and turn it into a resource
 unique to their situation. Fully updated and expanded, Operative
 Dictations in General and Vascular Surgery, Third Edition includes

significant additions that include flexible endoscopic procedures (now recognized as a core part of general surgery training and practice), single incision laparoscopic cholecystectomy, and robotic approaches to the rectum. The endovascular procedures have been significantly expanded, as have the approaches to venous disease and to A-V fistula creation. Operative Dictations in General and Vascular Surgery, Third Edition is intended for practicing surgeons, who may modify each template to reflect their own individual practice. It also serves as a concise reminder of essential steps in those operations that may be only rarely performed.
