

1. Record Nr.	UNINA9910254481103321
Titolo	Nursing Care of the Pediatric Neurosurgery Patient / / edited by Cathy C. Cartwright, Donna C. Wallace
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-49319-1
Edizione	[3rd ed. 2017.]
Descrizione fisica	1 online resource (XII, 613 p. 303 illus., 169 illus. in color.)
Disciplina	610.73 610.73072
Soggetti	Nursing administration Pediatrics Neurosurgery Neurology Nursing—Research Nursing Management Neurology Nursing Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Chapter 1. Neurological Assessment of the Neonate, Infant, Child, and Adolescent -- Chapter 2. Hydrocephalus -- Chapter 3. Craniostenosis and Plagiocephaly -- Chapter 4. Skull and Scalp Anomalies -- Chapter 5. Neural Tube Defects -- Chapter 6. Chiari Malformation and Syringomyelia -- Chapter 7. Tumors of the Central Nervous System -- Chapter 8. Traumatic Brain Injury -- Chapter 9. Pediatric Athletic Concussion -- Chapter 10. Abusive Head Trauma -- Chapter 11. Spine -- Chapter 12. Neurovascular Disease -- Chapter 13. Surgical Management of Epilepsy -- Chapter 14. Surgical Management of Functional Disorders -- Chapter 15. Infections of the Central Nervous System -- Chapter 16. Perioperative Care -- Chapter 17. Transition from Pediatric to Adult Care -- Chapter 18. Neuroimaging.
Sommario/riassunto	This updated third edition is a detailed reference for nurses and other

health care providers who care for children with neurosurgical conditions. The explanations of pathophysiology, anatomy, neurodiagnostic imaging, and treatment options for each neurosurgical diagnosis will help to clarify the rationale behind the nursing care. Descriptions of presenting symptoms, history and findings on neurological examination will help nurses understand the neurological disorder and identify problems. New chapters have been added on skull and scalp anomalies, pediatric concussion, abuse head trauma and on neuroimaging. Each chapter includes case studies, impact on families, patient and family education, and practice pearls. Staff and student nurses working in clinics, critical care units, pediatric units, operating rooms, post-anesthesia care units, emergency departments, and radiology departments will benefit from the information presented. Although this book is written for nurses, child life therapists, physical and occupational therapists, medical students and neurosurgery residents will also find it helpful. Parents of children with neurosurgical disorders will also find it a useful resource in understanding their child's condition.
