

1. Record Nr.	UNINA9910254492703321
Titolo	COPD [[electronic resource]] : Heterogeneity and Personalized Treatment / / edited by Sang-Do Lee
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2017
ISBN	3-662-47178-7
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (VIII, 341 p. 73 illus., 51 illus. in color.)
Disciplina	616.2
Soggetti	Respiratory organs—Diseases Pathology Radiology Pneumology/Respiratory System Diagnostic Radiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Overview -- Introduction: Summary -- Definition -- Epidemiology -- Risk Factors -- Pathology/Pathogenesis/Pathophysiology -- Assessment -- Introduction: Summary -- Symptoms: SGRQ, CAT, MRC -- Spirometry -- Images -- Biomarkers -- Comorbidity -- Heterogeneity -- Introduction: Summary -- Phenotypes of COPD -- Genetics -- Images -- ACOS -- Exacerbation -- Pulmonary Hypertension -- Management -- Introduction: Summary -- Prevention -- Pharmacologic -- Non-pharmacologic: LVR, Rehab, Nutritional support -- Management of exacerbation -- Management of Comorbidities -- Personalized Treatment: current practice and evidences from researches -- Prospective -- Cohort: KOLD, ANOLD; Big data, Network medicine.
Sommario/riassunto	This book explains how analysis of the heterogeneity of chronic obstructive pulmonary disease (COPD) enhances understanding of the condition and leads to improved, personalized treatment. State of the art knowledge is presented on a range of issues related to the heterogeneity of COPD, such as phenotypes (clinical, physiologic, radiologic, etc.), genotypes, and the tools to be used for dissecting

heterogeneity (CT, MRI, biomarkers, etc.). Especially modern radiologic imaging holds promise in this context, and its role is described in detail with the aid of numerous illustrations. The implications of the heterogeneity for personalized treatment are clearly identified, with description of an appropriate tailored treatment strategy for each subgroup of patients. Information is provided on both current and emerging strategies, including bronchoscopic lung volume reduction and approaches to the management of pulmonary hypertension and comorbidities. This book will be a great asset in clinical practice and research for all who have an interest in COPD, a leading cause of morbidity and mortality worldwide.
