

1. Record Nr.	UNINA9910254500703321
Autore	Jones Gary
Titolo	HIV and Young People : Risk and Resilience in the Urban Slum // by Gary Jones
Pubbl/distr/stampa	Cham, : Springer International Publishing, : Imprint Springer, 2016
ISBN	3-319-26814-7
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (129 p.)
Collana	SpringerBriefs in Public Health, , 2192-3698
Disciplina	616.9041
Soggetti	Infectious diseases Social structure Equality Infectious Diseases Social Structure, Social Inequality
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	1. Introduction -- 2. Vulnerability and Risk – health and well being in the slum -- 3. HIV as an urban epidemic -- 4. Young people – vulnerability, risk and HIV in the urban slum -- 5. Migration, young people and vulnerability in the urban slum -- 6. Conclusion – strengthening the evidence.
Sommario/riassunto	Revisiting the thinking on vulnerability to HIV and risk of infection, this book provides better understanding by considering the risk of HIV infection alongside notions of personal and collective resilience, dignity and humiliation. The work shows that young people in the urban slum dignify their world and, in doing so, establish priorities and draw on a set of references oftentimes intelligible to them alone. Moreover, humiliation, as an interpersonal event, adds to a sense of vulnerability and lies closely behind choices directly affecting personal health and livelihood. Thus, dignity and humiliation are shown for the first time to have a critical role in health seeking and risky behavior related to HIV, and this is an area in great need of further research. The crucial focus of this work is further emphasized by the rapid growth of urban slums, and high rates of HIV among both slum dwellers and young people, who continue to bear the brunt of the AIDS epidemic, thirty years on.

This comprehensive literature review provides a compelling argument that the time is right to further explore the nexus of risk and resilience from a people-centered perspective. Fresh insight is critical to reach the goal of ending AIDS by 2030.
