

1. Record Nr.	UNINA9910254501203321
Titolo	Atlas of Adult Autopsy : A Guide to Modern Practice / / edited by S. Kim Suvarna
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2016
ISBN	3-319-27022-2
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (402 p.)
Disciplina	610
Soggetti	Pathology Forensic sciences Forensic Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	General Considerations and Safety -- External Examination -- Evisceration -- Thorax: Heart, Lungs, Mediastinum, and Pleura -- Gastrointestinal and Hepatobiliary System -- Genitourinary and Breast Tissues, Including Pregnancy -- Lymphoreticular Tissues: Lymph Node, Spleen and Thymus, Bone and Marrow -- Endocrine Glands: Thyroid, Parathyroid, Adrenal, and Pituitary -- The Central Nervous System, with Eye and Ear -- Standard and Special Tests -- Devices: Foreign Items Encountered During the Autopsy -- The Forensic Autopsy -- The Radiological Autopsy -- Toxicology -- Appendix.
Sommario/riassunto	This atlas leads the reader through the adult autopsy process, and its common variations, with a large number of high-quality macroscopic photographs and concise accompanying text. It provides a manual of current practice and is an easy-to-use resource for case examination for consent, medico-legal and radiological autopsies. External realities and checks are discussed at the beginning of the book, which goes on to cover specific body cavities and organ systems in detail. The book ends with chapters on topics including forensic autopsies, specialist sampling, toxicology analyses and the radiological autopsy. Atlas of Adult Autopsy is aimed at practicing pathologists, particularly those in training grades. It may also be of interest to anatomical technicians in autopsy suites, as well as parties with a legal interest in autopsy

practice.
