Sommario/riassunto	Professor of Arabic at the National School of Oriental Languages then at the Sorbonne, director of studies at the Practical School of Advanced Studies, of the Institute of Islamic Studies of the University of Paris (1956-1965) and of the Centre for Arab Lexicography, Régis Blachère (1900-1973) is a monument of Orientalism and Arab studies in France. In his thesis on Mutanabbi his grammar of classical Arabic , through his Arabic-French-English Dictionary , the history of Arabic literature: the origins to the end of the XV th century AD and especially its "critical" translation of the Koran (1947) and his attempt to reclassify the suras in the chronological order of their revelation, no Arabist has been able to miss his work, of which this work, Analecta , brings together, in a long series of articles, the most striking texts. Among the themes addressed in this book published in his homage, literature comes first: "Leazal or courtly poetry in Arab literature", "Views on narrative literature in Arabic in the first century of the Hegira", "A secret garden: Arab poetry "... etc. But pride of place is also given to Koranic studies and to the evolution of sciences in the Arab world: "The speech of Mahomet during the Farewell Pilgrimage", "Note on the nafs

substantive" vital breath "," soul " in the Qur'an, "" Some thoughts on the forms of encyclopaedic Egypt and Syria the eighth / fourteenth century to the end of the IX/XVth century. "

Sommario/riassunto

Bringing together the most up-to-date information on all aspects of primary and revision total ankle replacement (TAR), this definitive text focuses on TAR procedures and prostheses available for use in North America with additional “lessons learned” from the international community. The text is evidence-based, includes bullet points for quick reference, and is heavy on step-by-step photographs during surgery. Accordingly, the chapter content over four main sections is a purposeful mix of theory, data, and tips/pearls with detailed photographs, tables, and references. Section One provides an introduction to and history of TAR, including a discussion of fixed versus mobile bearings, TAR versus arthrodesis, and current indications and contraindications for primary TAR. Section Two focuses on primary TAR, covering a number of contemporary systems, such as INBONE, INFINITY, SALTO TALARIS and STAR. Secondary procedures with TAR comprise Section Three, including management of wound healing complications, soft tissue injuries, and varus and valgus malalignment. Section Four discusses revision TAR, covering topics such as infected replacements, component subsidence, and limb salvage as well as issues surrounding specific implant failures. Comprehensive yet practical, Primary and Revision Total Ankle Replacement will be the gold standard for books on this topic for many years to come and will provide invaluable instruction to orthopedic surgeons, podiatrists and foot and ankle clinicians worldwide. .
