

1. Record Nr.	UNINA9910254507303321
Titolo	Melanoma // edited by Howard L. Kaufman, Janice M. Mehnert
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2016
ISBN	3-319-22539-1
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (413 p.)
Collana	Cancer Treatment and Research, , 0927-3042 ; ; 167
Disciplina	616.99477
Soggetti	Oncology Dermatology Surgery Pediatrics Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Heterogeneity in Melanoma -- Melanoma Epidemiology and Prevention -- Methods Of Melanoma Detection -- Melanoma: Clinical Presentations -- Principles Of Melanoma Stagin -- Surgical Management of Melanoma -- Adjuvant Therapy of Melanoma -- Chemotherapy for Melanoma -- Checkpoint Blockade for the Treatment of Advanced Melanoma -- Targeted Therapy for Melanoma -- Treatment of Melanoma CNS Metastases -- Treatment of Melanoma CNS Metastases -- Mucosal Melanoma: Epidemiology, Biology and Treatment -- Acral Lentiginous Melanoma -- Pediatric Melanoma and Atypical Melanocytic Neoplasms -- Novel Treatments in Development for Melanoma.
Sommario/riassunto	Melanoma is one of the most types of cancer. When melanoma is detected at an early stage, treatment is highly successful, but outcomes can be poor when the disease is advanced. There has been significant progress in our understanding of the molecular biology, genetics, and immunology of melanoma over the past decade. This has been accompanied by rapid advances in therapeutic strategies for patients with melanoma. This book provides the clinician and the researcher with a broad understanding of the molecular and cellular pathogenesis

of melanoma, explores the clinical characteristics and criteria for clinical and pathological staging of the disease, and provides an overview of current and evolving treatment strategies in the adjuvant, metastatic, and preventive settings. The treatment of special populations and rare variants of melanoma that often present particular clinical challenges is also covered. Authored by international experts in melanoma biology and clinical management, this volume concisely explains how to diagnose, treat, and prevent melanoma while reviewing advances in basic science and providing an overview of innovative approaches still under development.
